Current Percentage - 80	

# Projects

---

- **Business Connect —**  
Business Connect is a modern web platform that bridges the gap between individuals, small businesses, and local organizations. It offers a digital space for job postings, advertisements, and professional profiles, with a user-friendly interface. Built with a React.js frontend for a modular design, and a Firebase backend for real-time data storage, and scalability.

- **Image Differentiation Using Python —**

Designed and developed an image processing project using OpenCV and Python.

Utilized techniques such as grayscale conversion, thresholding, and edge detection.

Demonstrated expertise in computer vision and image processing.

- **Prime Line Hospital —**

Designed and developed a Google Sites website for Primeline Hospital in Kovilpatti, creating a digital presence for the hospital and providing essential information to patients and stakeholders. The website offers a user-friendly interface, showcasing the hospital's services, facilities, and contact details, ultimately enhancing patient engagement and accessibility.

- **Portfolio —**

Designed and developed a professional portfolio website using Wix, showcasing my skills, experience, and projects in a visually appealing and user-friendly interface. The website highlights my work, achievements, and services, providing a digital platform for potential clients and collaborators to discover my expertise and connect with me.
